SUMMARY

Senior Mobile Application Developer with 7+ years of experience building, scaling and maintaining production mobile applications across Android, iOS and cross-platform. Strong in Kotlin, Java, Flutter, Dart, React Native, Swift and Objective-C, with hands-on experience in mobile architecture, REST API integration, Firebase, AWS-backed services, offline-first workflows, secure authentication, payments, streaming media and CI/CD. Experienced in leading projects, working with product and design teams, mentoring developers and turning business requirements into reliable, user-friendly apps. Publisher of open source Flutter packages on pub.dev.

SKILLS

Mobile Development: Android (Kotlin, Java, Android SDK), Flutter (Dart), React Native (JavaScript, TypeScript), iOS (Swift, SwiftUI, Objective-C)

Architecture & State: Mobile application architecture, Provider, BLoC, state management, reusable components, responsive UI, offline-first workflows

APIs & Backend Integration: RESTful APIs, JSON, Firebase, Pusher, Salesforce APIs, authentication, role-based access, push notifications

Media & Device: ExoPlayer, HLS, DASH, RTMP, Widevine DRM, offline downloads, caching, sensors, location services, barcode scanning

Cloud, Data & DevOps: AWS, MySQL, Git, CI/CD pipelines, JIRA, Firebase Cloud Messaging, automated testing, release management

Commerce & Enterprise: POS systems, Square payments, Stripe and PayPal integrations, inventory workflows, MDM, Google APIs, App Store and Google Play delivery

EXPERIENCE

Senior Software Engineer, Xavor Corporation, Lahore, Pakistan, Jul 2025 - Present

- Develop and enhance mobile applications for Guitar Center, supporting customer-facing commerce experiences and internal store operations.
- Build and maintain Flutter and native mobile features with a focus on scalability, usability, code quality and reliable backend integration.
- Collaborate with product managers, designers, QA and client stakeholders to refine requirements, review technical approaches and deliver production-ready functionality.
- Contribute to inventory and store-associate workflows involving scanning, operational tools, API-driven data and device integrations.

Senior Software Engineer (Android), Techverx, Lahore, Pakistan, Aug 2024 - Jul 2025

- Built and optimized Android POS applications supporting payment processing, inventory management, order workflows and customer data tracking.
- Developed maintainable Android solutions in Kotlin and Java, translating business requirements into scalable architecture and reusable components.
- Led Android development for an OTT streaming platform with ExoPlayer, adaptive bitrate playback, HLS/DASH/RTMP, secure media delivery and Widevine DRM.
- Worked directly with clients and stakeholders to clarify requirements, resolve technical challenges and improve performance across devices.

Senior Mobile Application Developer, Xavor Corporation, Lahore, Pakistan, Aug 2022 - Aug 2024

- Delivered Android applications in Kotlin and Java, and cross-platform products in Flutter and React Native (JavaScript/TypeScript).
- Led mobile projects from requirement analysis through implementation and release, balancing delivery timelines with maintainability and quality.
- Integrated REST APIs, authentication, cloud-backed data and third-party SDKs while troubleshooting performance and reliability issues.
- Partnered with clients to refine product ideas, communicate progress and convert functional requirements into production mobile apps.

Senior Flutter Developer, Revglue.com, Lahore, Pakistan, Nov 2021 - Jul 2022

- Led development of user-focused Flutter applications and maintained existing Android applications built with Java and Kotlin.
- Guided developers, coordinated implementation priorities, reviewed progress and helped ensure timely delivery against project goals.

Mobile Application Developer, HighApp Solutions, Lahore, Pakistan, Jan 2020 - Nov 2021

- Built mobile applications with Flutter and native Android, integrating APIs, authentication, notifications and data-driven features.
- Supported full-stack delivery by integrating mobile clients with PHP backend APIs and MySQL-backed workflows.
- Used JIRA for planning and delivery tracking while leading development activities and resolving technical issues across projects.

Android Developer, KTechZ, Lahore, Pakistan, May 2019 - Jan 2020

- Contributed to the official DOCE Sweets & Bakers Android application in Kotlin, enabling customers to browse products and place orders.
- Collaborated with developers and stakeholders on implementation, testing and release readiness.

Android Developer Intern, NetSol, Lahore, Pakistan, Oct 2018 - Apr 2019

- Contributed to BeeList, an Android application integrated with IoT devices for on-site marketing, covering planning, coding, testing and device integration.

PROJECTS

Friday POS (fridaypos.com): Android POS platform with payment processing, inventory and order workflows, Firebase/Pusher real-time synchronization, REST APIs, Square payments, offline mode and dynamic menus. Reduced unnecessary API traffic by 30% through more efficient state management.

TAVRTalk (Edwards Lifesciences) (play.google.com/store/apps/details?id=com.tavrtalk.app): React Native medical community app for Valve Clinical Coordinators with real-time discussions, secure authentication, role-based access, responsive UI and performance-focused data handling.

Muslimeen: Athan, Quran, Qibla (play.google.com/store/apps/details?id=com.fortune.apps.muslimeen): Flutter Islamic companion app with prayer times, configurable adhan alerts, Quran reading and audio, Qibla direction using device sensors, daily duas and hadith.

AppTak Online Shopping (play.google.com/store/apps/details?id=muller.phipps.pakistan.apptak.pk): E-commerce marketplace app for Muller & Phipps Pakistan covering electronics, appliances, phones and groceries, with cash on delivery and online payments.

Clique: Friends Group Chat (play.google.com/store/apps/details?id=com.joinmyclique.app): Private group chat app for friend groups and clubs, with a daily conversation prompt, streaks and event planning.

Alliance TrueCare (play.google.com/store/apps/details?id=com.truecareccm): Remote patient monitoring app that connects over Bluetooth to blood pressure monitors, glucometers, pulse oximeters, weight scales and thermometers to track vitals.

OTT Streaming Platform: Android streaming app using ExoPlayer with HLS, DASH and RTMP; adaptive playback, Widevine/PlayReady DRM, caching, authentication, recommendations and offline downloads.

Customer 360: Flutter app integrating Salesforce APIs for real-time customer data, secure role-based access, caching, offline usage and workflow support for sales and service teams.

OPEN SOURCE

Verified pub.dev publisher umarghaffar.is-a.dev. MIT licensed Flutter packages:

- **scroll_edge_blur** (pub.dev/packages/scroll_edge_blur): Progressive, iOS style edge blur for scroll views, toolbars and headers, using a GPU shader on the backdrop.
- **liquid_glass_navigation** (pub.dev/packages/liquid_glass_navigation): iOS 26 style Liquid Glass navigation: floating glass bottom bar, side rail and adaptive scaffold.
- **smart_signature** (pub.dev/packages/smart_signature): On-device signature field that removes jitter, pen hooks and stray marks and adds pen-like ink.

EDUCATION

MPhil, Computer Science, University of the Punjab, Lahore, Pakistan, 2020 - 2022

BS Computer Science, University of Gujrat, 2015 - 2019

Final project: Cheque Detection System using OCR, OpenCV and Keras.
